The „Mollath“ case has brought forensic-psychiatric issues to the focus of public attention. It became apparent once more that in dealing with criminal acts by (allegedly) mentally ill persons intricate legal, psychiatric and ethical problems have to be solved. Adequate solutions can only be found through interdisciplinary cooperation of legal scholars and psychiatrists. The present volume combines contributions of renowned experts from both fields that add up to an excellent overview of fundamental questions as well as current developments.

With contributions by:
Rüdiger Deckers, Manuela Dudeck, Heiner Fangerau, Katrin Höfler, Johannes Kaspar, Michael Lindemann, Stefan Orlob, Heinz Schöch, Tilman Steinert
