

Postdoc position in pediatric cancer research

The position is open immediately in the Section Experimental Pediatric Oncology (Prof. Beltinger; www.uniklinik-ulm.de/beltinger) within the large Research Laboratories of the Department of Pediatrics and Adolescent Medicine (Head: Prof. Dr. K.M. Debatin).

Your project:

Investigating cellular and molecular mechanisms of a novel oncolytic measles virus, and its toxicity in young and markedly immunocompromised animal hosts.

Your profile:

A PhD degree in Biology, Molecular Medicine or related field is required. Experience with standard methods of molecular and cellular biology (including quantitative RT-PCR, protein and enzyme analysis, immunohistochemistry), viral gene transfer, methods of experimental oncology and with animal tumor models is expected. The postdoc will supervise students and technicians, and will interact with collaborators abroad. Fluency in German and English is required.

Our offer:

Salary according to TV-L. Very good scientific environment, broad repertoire of methods, supportive supervision and a friendly group. Short-term visits to other labs in Germany and abroad.
