UPSIDES	Using Peer Support In Developing Empowering Mental Health Services	<p>UPSIDES will scale-up peer support interventions for people with severe mental illness in high-, middle- and low-resource settings. An international community of practice for peer support including peer support workers, mental health researchers, and other relevant stakeholders in Europe, Africa and Asia (8 study sites in 6 countries) will be established. Peer support will be implemented adapted to the local context. Using a mixed-methods approach, the impact of peer support will be rigorously evaluated at the levels of patients and peer support workers (psychosocial and clinical outcomes), services (cost-effectiveness, return on investment), and implementation (adoption, sustainability, organisational change). Evidence of best practice will be disseminated to local, national and international stakeholders ensuring sustainability and spread.</p>	EC Horizon2020 / SC1-HCO-07-2017 779263	01/2018-12/2022 / 3,100,000 €	Coordinator
